PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in the rare intersection of technical SEO and full-stack development. Proven track record of delivering measurable business impact: achieved 217% organic traffic growth and improved domain authority by 60% for international tourism client. Combines deep technical expertise (ASP.NET 8, C#, JavaScript, AWS) with strategic SEO understanding to build high-performance, search-optimized web applications. Seeking remote opportunities with companies that value data-driven results and cross-functional technical skills.

KEY ACHIEVEMENTS

- **Generated 217% increase in organic traffic** for Classic Zambia Safaris (from 61 to 194 monthly visitors), driving international traffic from US, UK, Australia, and 12+ countries through strategic SEO optimization
- **Improved Ahrefs Domain Rating from 20 to 32** (60% increase) in 13 months through technical SEO strategy, content optimization, and link building
- **Achieved #1-2 Google rankings** for 12+ primary keywords including 'Classic Zambia Safaris', 'Kutali Camp', 'Zambia Safari', generating 987 monthly organic clicks with 70% CTR on branded terms
- **Built from zero to organic presence** for House To Home real estate platform, establishing initial traffic and Domain Rating of 3 while optimizing 438+ pages of local search content
- **Architected full-stack ASP.NET 8 web applications** with responsive UI, RESTful APIs, Entity Framework ORM, and SQL Server databases, deployed with CI/CD pipelines achieving 95+ Lighthouse performance scores

PROFESSIONAL EXPERIENCE

Web Developer & SEO Specialist — January 2025 - Present

BNOP Media | Lusaka, Zambia

- Spearheaded SEO strategy and technical optimization for multiple high-value client accounts, driving measurable revenue impact through increased organic visibility and lead generation
- Managed complete website redesign and migration projects, transitioning from legacy systems to modern, high-performance production sites while maintaining 100% uptime
- Conducted comprehensive SEO audits of 60+ content pieces, implementing technical fixes and on-page optimizations that improved search rankings and user engagement metrics
- Architected technical SEO infrastructure for 100+ article content strategy, including schema markup, internal linking architecture, and performance optimization
- Monitored and analyzed site performance using Google Search Console, Ahrefs, Moz, and Google Analytics, providing data-driven recommendations to stakeholders
